

**AMENDMENTS TO THE SPECIFICATION**

Page 7, the second full paragraph beginning on line 13, please amend as follows:

The ~~prevent~~-present invention is attained in view of such a case. Accordingly, the purpose of the present invention is to provide a wireless terminal, a base device, a wireless system, a wireless terminal control method, a base device control method, a wireless terminal control program, a base device control program, and a computer-readable storage medium, which can notify a user an establishment of a wrong connection in a case where a wrong wireless connection for the user is established.

Page 35, the second full paragraph beginning on line 17, please amend as follows:

To explain more specifically, when the TV main unit 3 transits to the connection processing mode, the TV main unit 3 reads a common key stored in the EEPROM 65 and encrypt/decrypt a command and data transmitted/received by this common key. Moreover, when transiting into the connection process mode, the wireless centers 2a and 2b reads out the common key stored in ~~EEPROM 38~~ EEPROM 38, and performs the encryption/decryption of the command and data to be transmitted/received. This makes it possible for the TV main unit 3, and wireless centers 2a and 2b moved in the connection processing mode to encrypt a command and data transmitted/received among the TV main unit 3, and the wireless centers 2a and 2b.
